

SKYE ROPE ACCESS LTD

Skye Rope Access (SRA) would like to offer their services for Geotechnical Inspection to your company or organisation.

SRA provide the complete package for Geotechnical surface maintenance, from full and thorough inspections to advising on maintenance procedures and installing specialised and tailored solutions to meet the clients requirements.

SRA will provide fully qualified rope access trained, Geotechnical Engineers to survey any natural surfaces and provide full detailed reports on their condition.

Using rope access trained engineers allows for the inspectors and engineers to gain unprecedented access to the areas in question allowing for much more detailed, thorough and accurate inspection.

SRA will advise clients, using the inspections results on how best to proceed in geotechnical maintenance including, but not limited to, methods for soil stabilisation and rock fall prevention.

SRA also have a great amount of experience in installing specially designed state of the art geotechnical maintenance systems, built to meet clients requirements, and to ensure the safety standards of all areas dealt with.

SRA take pride in working closely with specialised engineering and manufacturing firms to ensure that every product sourced and provided is of the highest quality, and is guaranteed last.

SRA provide this service, among others at one of the most competitive prices in the UK and guarantee the delivery of a safe, effective, efficient and cost effective solution.
